Chuck Moles and Erik Humble  
MoCo Engineering and Fabrication  
24806 E. Wellesley Avenue  
Otis Orchards, WA 99027-9770

Dear Chuck and Erik,

I would like to thank you and also recommend your company (MoCo) to any of our other mills using a Lunden Stacker.

We have had our share of problems with this stacker in the past and you have been very helpful in rectifying any problems. I would especially like to thank you for going over our stacker and suggesting the upgrades to our Stick Placer, Rake-off and Pullback that you did on March 10-11, 2001. We were constantly having rake-off and stick placing problems. Due to these modifications our stacker is stacking better than it has ever stacked. This should greatly reduce our drying defects and stick breakage at the planermill tilt hoist.

Also, I would like to commend MoCo on your Stick Accumulation System. It is doing a good job and has greatly improved our stick uniformity from the planermill to the sawmill stacker.

Thanks,

Bruce Barr
